I once fitted an old CD ROM drive in to a car I once owned. I just built a 12V and 5V voltage regulator circuit, and connected it using a red, yellow and black power lead salvaged from a scrapped computer power supply, The Audio output went to one of those coupling devices that fit into the cassette player of the car radio.

Turning a old CD ROM drive into a stand alone CD Player

ACD-ROM drive can be used as a stand-alone unit for playing digital audio CDs without interfacing with a computer. The stereo output of CD player available at the audio jack can be amplified using audio input facility which is normally available on a tape-deck/tape-recorder or a stereo amplifier.

1. Insert the USB drive and the CD into the computer system. 2. Now, Press Windows key + E key and open the File explorer, there select the This PC. 3. In This PC, please select the Cd drive. There select all the music files you want to transfer to USB drive and then right click and select copy. 4.

How to transfer music files from a CD to an USB flash drive?

As the title says, I am looking for a recommendation for an external cd drive to use for ripping my 3000 cds. Because of where the pc is placed, the internal cd drive is simply not at all easily accessible, and thus, not usable for this purpose. Thanks for any help with this.
