Realistic drawings of frogs, toads and turtles will help children from Pre-K through Grade 4 identify small woodland creatures. Contains drawings and text on each page with crafts on last two pages. I especially like the text boxes which give children good tips, such as, "Be kind to animals."

Amazon.com: Customer reviews: Frogs, Toads & Turtles: Take ...

Toads have dry, rough and bumpy skin covering a wide body while frogs are slender with smooth, moist skin. Frog eyes are higher on the head than toads and are rounder and bulging. And there's a reason we play "leap frog" - frogs take long, high jumps but toads run or take small hops. Check out our fun fact sheet on Oregon's frogs and toads.

Frogs and Toads | Oregon Department of Fish & Wildlife

However, it might surprise you to learn that the largest frogs and toads will eat small mice, baby turtles, small frogs, and baby snakes! Additionally, many frogs and toads will starve even if they are surrounded by dead insects because they NEED to sense motion to understand that what surrounds them is food.

Amphibians and Reptiles Field Guide Books for Kids # ...

A golden dart frog's poison is strong enough that a single frog can kill 10 men with a single dose; it only takes 2 micrograms, an amount that can fit on a pinhead, to fell a single human adult. While the cone snail and box jellyfish are relegated to just the ocean, the golden dart frog's habitat continues to shrink due to urban development.

Can You Die from Touching a Poison Dart Frog? | Caring Pets

Etymology and taxonomy. The use of the common names "frog" and "toad" has no taxonomic justification. From a classification perspective, all members of the order Anura are frogs, but only members of the family Bufonidae are considered "true toads". The use of the term "frog" in common names usually refers to species that are aquatic or semi-aquatic and have smooth, moist skins; the term "toad ...

How do frogs survive winter? Why don't they freeze to ...

DO NOT TAKE IT HOME. DO NOT RELOCATE the turtle. Box turtles have a homing instinct and they will try to get back to the area they came from. If you move it far from it's home you will cause it to likely get killed trying to get back to it's home, so leave it in the area found, do not bring it to a nicer park. Kids Catching Frogs & Toads
