property and the environment.. Firefighters typically undergo a high degree of technical training. This involves structural firefighting and wildland firefighting.

Firefighting - Wikipedia

It shows that the angle of attack is slightly less, the amount of total rotor thrust is the same as the gross weight, the blade angle is smaller, the power required to overcome the reduced rotor drag (or torque) is less and the collective control lever is lower than when hovering out of ground effect. Therefore, there is better lift/drag ratio.

'Interstate minors' are interstates consisting of three digits with the 2nd and 3rd digit being the same as the interstate major that it runs off. For example, the interstate minor '470' runs off the interstate highway 70. As the 470 starts with an even number, it connects back to the interstate highway 70.

The speed of light in vacuum, commonly denoted c , is a universal physical constant that is important in many areas of physics. Its exact value is defined as 299 792 458 metres per second (approximately 300 000 km/s or 186 000 mi/s).

According to the special theory of relativity, c is the upper limit for the speed at which conventional matter, energy or any signal carrying information can travel ...
