Letting In Light

Visible light. Visible light is the small part within the electromagnetic spectrum that human eyes are sensitive to and can detect. Visible light waves consist of different wavelengths. The colour of visible light depends on its wavelength. These wavelengths range from 700 nm at the red end of the spectrum to 400 nm at the violet end.

Colours of light — Science Learning Hub

Jewish tradition considered Israel and Jerusalem as the “light of the world.” Jesus says instead that His disciples are the light of the world. That shouldn't really surprise us; Jesus, after all, is Himself the true light. “That was the true Light which gives light to every man coming into the world” (Jn 1:9). “I am the light of ...

Expository Sermon Matthew 5:13-16 - Letting Your Light Shine before Men

Light Reflectance Value, or LRV, can range from near to 100-percent for pure white down to close to 0-percent for black. All colors in-between will have greater or lesser LRV. White is the brightest: Nothing is brighter than white. If you really don't like white but really want more light, look into whites with some other color tones; white ...

“There is a crack in everything. - Goodreads

Whether you're replacing an existing garage door or buying one for a new house, a garage door with windows has its benefits. One of the biggest differences you'll notice is the abundance of natural light windows add inside of the garage. It's nice to not have to open the door or rely on an overhead ceiling bulb to illuminate the entire space.
