The circular flow of income or circular flow is a model of the economy in which the major exchanges are represented as flows of money, goods and services, etc. between economic agents.The flows of money and goods exchanged in a closed circuit correspond in value, but run in the opposite direction. The circular flow analysis is the basis of national accounts and hence of macroeconomics.

The revision process identified the key clauses most commonly amended in SALEFORM and pinpointed areas where ambiguity in the '93 edition had, on occasion, led to misunderstanding and uncertainty. The new edition brings greater clarity to the agreement as well as amended wording that reflects current commercial practice.
