The time something happens at the spacecraft, such as a science observation or engine burn. One-Way Light Time (OWLT) The time it takes for a signal - which moves at the speed of light through space - to travel from the spacecraft to Earth. From Saturn, one-way light time can range from about one hour and 14 minutes to one hour and 24 minutes.

What Time is it in Space? - NASA Solar System Exploration

Overview: Until the Cassini mission, little was known about Saturn's largest moon Titan, save that it was a Mercury-sized world whose surface was veiled beneath a thick, nitrogen-rich atmosphere. But Cassini mapped Titan's surface, studied its atmospheric reactions, discovered liquid seas there and even sent a probe to the moon's surface, completely rewriting our understanding of this ...
