Even with such a massive company, their appliances still run into operating issues. If your whirlpool washer isn't working, you're probably frustrated and desperate for a reason why. Some of the most likely reasons why your Whirlpool washer isn't working include uneven loads, hot water issues, and the washer's timer being stuck.

### **Whirlpool Washer Repeating Cycle/Keeps Draining/Shuts Off/Not Working**

The most common sign of a leaky drain hose is water collecting underneath the washer. If you find this, turn off the washer and call a service repairman as soon as possible. A kink in your washing machine's water supply line can lead to increased pressure in the line, resulting in water leaks. To avoid this problem, check your hose regularly ...

### **4 Reasons Why Whirlpool Washer Leaking From Bottom - KCSCFM**

Most washers require a continuous water supply of about 4L per minute to operate normally. Many pressure washer manufacturers recommend using a 3/4" diameter hose instead of the much more common 5/8" diameter hose to supply water to the pressure washer. Check for any kinks or blockages in your hose.
